

Sweetheart Snowflake

This pattern variation came about as I was working through Gina Butler's Bride's Garter pattern. Before starting the second row of her pattern I played around with curving the first row. There was potential for a snowflake motif. I have received permission from Gina to share this variation of her pattern. I hope you enjoy it!

Gina's original garter pattern can be found at: <http://ginabea.com/tatting.php>

Attach paperclip to save a space for joining the final chain.
